

Northland Farmer Information Needs Workshop

Monday 30th August

2.00 - 5.00 pm

Barge Showgrounds Events Centre
(SH14, Maunu, Whangarei)

The Northland Agricultural Forum (NAF) has recently completed a comprehensive review of the information and research needs of Northland farmers through work funded by Sustainable Farming Fund, Beef + Lamb NZ and DairyNZ. This involved a combination of workshops and telephone survey interviews with nearly 200 farmers, and has highlighted dairy, and sheep and beef:

- Information needs
- Preferences on how they like to access information
- Northland research gaps

You are invited to a workshop to discuss these findings, and consider components of a response to the key issues identified for Northland. It will be an opportunity to consider how Northland rural professionals can best meet the information needs of their farmers/clients.

This opportunity is put on by NAF in partnership with the NZ Association of Resource Management.

RSVP to Helen.moodie@landcare.org.nz
by 25th August.
